

Plan of the **practical lessons** on pathological anatomy for the students of the medical faculty in **autumn semester 2023/2024** acad.year

| No | Dates | The topics of the practical lessons |
|-----|-------------------|--|
| 1. | 01.09.2023 | Introduction to the Systemic Pathology. Disease: Features, Complications, Causes of Death. |
| 2. | 04.09-8.09.2023 | Cardiovascular diseases: Endocarditis: Infectious Endocarditis, Eosinophilic Endomyocardial Fibrosis; Myocarditis; Pericarditis; Pericardial Effusions; Atherosclerosis. Systemic Diseases of Connective Tissue: Rheumatic Fever. Complications. |
| 3. | 11.09-15.09.2023 | Cardiovascular Diseases: Hypertensive Vascular Disease, Hypertensive Heart Disease. Ischemic Heart Disease: Angina Pectoris, Myocardial Infarction. Chronic Ischemic Heart Disease. |
| 4. | 18.09-22.09.2023 | Diseases of the Gastrointestinal Tract Tonsillitis, Acute and Chronic Gastritis, Peptic Ulcer Disease, Appendicitis. Complications. |
| 5. | 25.09-29.09.2023 | Diseases of the Liver and the Biliary Tract: Hepatic Steatosis; Massive Hepatic Necrosis; Hepatitis; Cirrhosis (Portal Hypertension); Primary Carcinoma of the Liver. Gallstones (Cholelithiasis). Complications. |
| 6. | 02.10-06.10.2023 | Diseases of the intestines: Crohn Disease, Ulcerative Colitis Control lesson: Topics 1-6 |
| 7. | 9.10-13.10.2023 | Diseases of the Kidney. Glomerular Diseases. Acute Tubular Necrosis. Tubulointerstitial Nephritis: Acute and Chronic Pyelonephritis. Benign and Malignant Nephrosclerosis. Renal Stones. Hydronephrosis. Renal Cell Carcinoma. Complications. |
| 8. | 16.10-20.10.2023 | Diseases of the Endocrine System: Pituitary, Thyroid, Adrenal Cortex, Endocrine Pancreas. Complications. |
| 9. | 23.10-27.10.2023 | Diseases of the Genital system: Nodular Hyperplasia of the Prostate, Endometrial Hyperplasia, Fibroadenoma of the Breast. Diseases of the Pregnancy; Gestational Trophoblastic Disease. |
| 10. | 30.10-03.11.2023 | Control lesson: Topics 7-10 |
| 11. | 06.11-10.11.2023 | Viral Diseases: Influenza, Parainfluenza, Measles, Acquired Immunodeficiency Syndrome. Complications. |
| 12. | 13.11-17.11.2023 | Respiratory Tract Infections: Scarlet Fever, Diphtheria, Meningococcal Infection, Pertussis. |
| 13. | 20.11-24.11.2023 | Bacterial Infections of the Intestinal Tract: Enteric Fever, Salmonellosis. Bacillary Dysentery, Cholera. Complications. |
| 14. | 27.11-01.12.2023. | Tuberculosis: Primary, Haematogenous, Secondary. |
| 15. | 04-08.12.2023 | Sepsis. Fungal Infections: Candidiasis, Actinomycosis. Complications. |
| 16. | 11-15.12.2023 | Dangerous (Quarantine) Infections: Plague, Anthrax. Complications. |
| 17. | 18-22.12.2023 | Rickettsial diseases: Epidemic and Sporadic Fever, Q Fever. Complications. Control lesson: Topics 11-17 |
| 18. | 25-29.12.2023 | Summarizing of the spring semester. Testing. |

Head of the Department of Pathological Anatomy,
Professor Chukov
30.08.2023

Plan of the **lectures** on pathological anatomy for the students of the medical faculty in **autumn semester 2023/2024** acad.year

| No. | Dates | The topics of the lectures |
|-----|-------|---|
| 1. | | Systemic Diseases of Connective Tissue. |
| 2. | | Diseases of the Gastrointestinal tract: Gastritis, Peptic Ulcer Disease, Appendicitis. Diseases of the Liver and the Biliary Tract: Hepatic Steatosis; Massive Hepatic Necrosis; Hepatitis; Cirrhosis (Portal Hypertension); Primary Carcinoma of the Liver. Gallstones (Cholelithiasis). |
| 3. | | Diseases of the Kidney. Glomerular Diseases. Tubulointerstitial Diseases. Nephrosclerosis. Renal Stones. Renal Cell Carcinoma. |
| 4. | | Diseases of the Pregnancy. Diseases of the Endocrine System. Diseases of the Genital system |
| 5. | | Infectious Diseases. Viral Infections. |
| 6. | | Bacterial Infections of the Intestinal Tract. Respiratory Tract Infections. |
| 7. | | Tuberculosis. Sepsis. |
| 8. | | Dangerous (Quarantine) Infections. |

Head of the Department of Pathological Anatomy,

Professor

S.Z. Chukov

30 August 2023
